

Homework #04

See course website for due date.

Directions:

Please submit this homework using Wolfware. **One submission per team only.**

For Homework, you need to take a *clear (ie – not blurry)* photograph of your vehicles. The cars should be the subject of the picture (a close up of it, not one taken from 20 feet away.) This is to be done as a team effort, all team members photos being inserted into a **Power Point slide** presentation. Each page will contain a picture. The first page should contain a picture of all four cars.

The file name is to be Team_##.ppt where ## is your team.

Your vehicles must have your team number or team name on them when the photos are taken. The team number / team name has to be large enough on your vehicle that it can be read from 10 feet away, but note – do not take your pictures from 10 feet away.
